

November 25, 2025: On the Intention of America's Intelligence Community to Subvert the Republic / Democratic Ideals of America

I am writing this message at 4:49 a.m. as I work privately inside of my home under the strict scrutiny of a group of criminals that are monitoring my daily life from inside of the intelligence community of America.

The unmistakable impression that is being forced over my home as a constant form of messaging (to essentially brainwash me whether I choose to engage in their media or not) is that they are a king.

Now, I am not opposed to the concept of a proper king, however, there is nothing proper about a group of criminals presenting themselves as a 'king' from inside of the national security administration of a democratic republic.

I am writing these messages to alert the world to the facts that are being presented to me as soon as those facts become clear enough to share.

I am writing (seriously, I spend alot of time documenting and recording this phenomenon) to alert the world that there is, in fact, a group of criminals operating within the USA government and they have no intention of ever leaving power willingly.

Law enforcement appears completely captured now and I do not see much hope for the existing state of affairs.

Public notice and public knowledge of these unfortunate events is crucial to shining a light of truth on their hiding places deep within the USA military.

I am presenting very clearly that I am being given the distinct impression that the military has become overtaken by a criminal force and that the criminal force is controlling the rest of the government - which is the exact opposite of the fitting and proper manner in which America should operate.

I am advocating for peace, because I believe that it is the correct course of action and I firmly believe that this criminal force is, in fact, attempting to stir up a civil war for their own benefits.

Sun light is the ultimate disinfectant for this type of event and we must not hide their crimes for the 'protection' of our country's reputation.

Something has gone seriously wrong in America and **people within the military are attempting to present themselves as an evil king.**
